TOTALS	795	587,428	566,791	9,076	1,633	\$16,404.20	\$355	\$555.95

¹ The number of license time frames on which agencies reported is less than the number of license time frames for which agencies made rules because agencies combined time frames in the report.

² The number of applications received may not equal the number of licenses issued and denied within the time frame plus the number acted upon outside the time frame because applications may be withdrawn or still in the process of being reviewed.

³ A position vacancy for an extended period of time and personnel difficulties resulted in these applications being acted upon outside the time frame. Because no fee is charged for the license, no fees were returned.

⁴ The Board's new executive director was not able to provide the required information because records were not maintained by previous staff.

⁵ Renewals are done biennially. They were not done this year.

⁶ Renewals are done biennially. They were not done this year.
